5G VR Art and Culture Course

3Education's 5G VR Art and Culture Course harnesses the power of HTHK's high-speed, low-latency 5G network and VR technology to create an immersive educational experience for students. They can choose between two courses: 3D Art Exploration or Graffiti Creation. With VR technology, students can travel through different historical periods and learn about artworks in various cultural contexts, or switch locations at any time to create graffiti in VR.

- Breaking the constraints of time and space, the course allows students to immerse themselves in artworks from all over the world, encouraging them to understand and respect multiculturalism and to value history and cultural heritage
- Free from the constraints of the real world, students can freely create and express themselves in VR to enhance their painting skills and stimulate their creativity
